In the land of the emerald green foliage and azure waters is nestled the quaint town of Dandeli. Blessed in bountiful by the River Kali, Dandeli and its surrounding region is a nature-lover's paradise.

This is the tapering end of the Western Ghats with rows upon rows of tree - laden hills, shrill sounds of the hundreds of species of birds, the peering eyes and shrieks of wild animals, the intoxicating smell of the forests and the rumbling rough fast flowing Kali.

Welcome to the abode of peace and tranquility amidst nature, the perfect getaway for your much deserved holiday!

## THE KALI

This gorgeous feisty river originates at Kushavali and meanders through dense forests towards the Supa Dam.

On its way, it turns and gushes and because it's laden with minerals, looks so dark, that people began calling it the Dark River – Kali!

The Kali meets several other tributaries, jumps over a gorge to form the mesmerizing Sattodi falls, slows down at the marshland before draining into the Arabian sea near Karwar.

The river loves Dandeli where it flows in true glory, giving rise to several rapids. The river is very unlike the other rivers in this region it's fast, it's gorgeous and it's perfect for adventure.
